PROFILE

I am a web developer from Lagos who designs and builds full-stack products. I learned to code on my own, stepped away for a while, and came back in September 2025 to build properly. My main stack is Next.js, TypeScript and Node.js. I use AI tools as part of my workflow, and I decide what gets built and how it looks. I keep reworking a project until it has my taste in it.

HOW I GOT HERE

- **Late 2023** - Started teaching myself HTML and CSS from video lessons and built basic pages while in secondary school.
- **2024** - Practised on and off. JavaScript felt difficult at the time, so progress slowed.
- **September 2025** - Returned to coding full-time after finishing secondary school. Learned JavaScript properly, then React, then Harvard CS50 coursework (web development, UI/UX, Python basics), then Node.js by building projects and debugging them. Settled on Node.js and Next.js as my main stack.
- **September 2025** - Began PHP template-design work with Kiki, a Canva-style design platform (on hold since the owner stepped back).
- **2026** - Built and launched NoteForge, designed and built the 2KRAZZY online store, and built the Orad Koncepts website.

PROJECTS

NoteForge - AI study app (live)

Next.js (App Router), TypeScript, Tailwind CSS, Supabase, Gemini API, Vercel | getnoteforge.vercel.app

- Built because course notes arrive as long PDFs that repeat themselves and are written as textbooks, not for revising.
- Three modes: Forge (study notes, flashcards and practice questions in one download), Analyze (explanations and step-by-step worked solutions) and Prep (interactive practice with reasons for each answer).
- Google sign-in, daily credits, saved library, fallback handling when the AI model is rate-limited.
- Next: PowerPoint upload and support for other languages.

2KRAZZY - online store (live)

Next.js (App Router), TypeScript, Tailwind CSS | 2krazzy.vercel.app

- Designed and built the store for a friend's Lagos streetwear brand, in exchange for promotion of my work.
- Product grid with colour options, cart and WhatsApp checkout, built for phones first.

Orad Koncepts - art brand website (client preview)

Next.js | orad-art-preview.vercel.app

- Designed and built a gallery-style website for an art brand. Preview build with placeholder imagery.

EXPERIENCE

Freelance web developer, 2025 to present

- Pitched small businesses with working preview sites, first in HTML, CSS and JavaScript, then in Next.js and Node.js.
- Designed and built the 2KRAZZY store and the Orad Koncepts website.

Template designer (PHP), Kiki - September 2025, currently on hold

- Designed templates for a Canva-style design platform.

SKILLS

Daily: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS
On real projects: TypeScript, Node.js, Supabase, PostgreSQL and SQL, Gemini API, PHP, Git and GitHub, Vercel
Fundamentals: Python
Tools: VS Code, Claude

EDUCATION, LANGUAGES AND INTERESTS

Diploma in Computer Science (in progress), Nigeria
Harvard CS50x and CS50W (edX, self-paced, free audit track). Learned JavaScript, React and Node.js from video courses and by building projects.

Languages: English, Yoruba **Interests:** football (Real Madrid supporter), design, building things.
